

“Affinity’s link has been a great success; we’ve had excellent performance year on year”

1 Money saving

Usually pays for itself in 18 Months, no heavy recurring annual costs means that microwave normally saves money over a typical 3 Year comparison period.

2 Quick installation

Very quick to install, equipment can be installed in days following order to provide high speed connectivity to your site. No 65+ day lead times that are subject to Council permission for wayleave agreements and road closure delays!

3 High throughput & performance

Deliver high capacity full duplex connectivity to your remote site very quickly. Bandwidths from 40Mbps to 1Gbps available, for short industrial estate hops, or to reach over long distances when using licenced microwave.

4 Add Bandwidth in seconds

Need more bandwidth? The vast majority of our microwave vendors provide scalability built into their products. If you need to add more bandwidth you can purchase an email able licence key. Once added to the system, bandwidth is added to the system instantly with no requirement for engineering visits or hardware changes.

5 Only viable option

If your business is located in an area with poor fibre infrastructure, or you have something like a large road, canal or expanse of water to cross then microwave is the only option. Modern high reliability microwave products make connecting difficult to reach buildings very easy.

Affinity Microwave System at The Hay Festival

6 Tax options

Any equipment that you own can have a capital allowance against tax (CAPEX). If you don’t want to own the equipment then you can spread the cost with one of our competitively priced lease or rental packages and run it as an Operating expense (OPEX). A microwave link from affinity puts you in control of your finances

7 Resilience

Microwave can offer an alternative path to back up existing leased line connections. Through the air connectivity can be an integral part of your Disaster Recovery Plan. Even with diverse routed fibre into buildings they can very often be found to run in the same duct making the site vulnerable to external damage.

8 Temporary Link

We can rent microwave equipment to you on a temporary basis to provide connectivity to your site quickly and without the high cost of purchasing equipment.

9 Free site survey

All our surveys within a certain range of our offices are available free of charge. We can discuss your requirements and give you a fixed price quotation for the connectivity and bandwidth you need.

10 Redeployable

Moving premises? The microwave equipment can be redeployed at your new site. You do not need to enter into another 3 year contract or face further heavy upfront costs to install when compared to a Leased Line.
